REMINDER:

Samples **must** arrive at A Brite Company Laboratory intact, properly boxed, bottled **and labeled with a minimum of: Customer Name, Sample Identification (i.e. name of bath, process or both)**. Samples not in proper bottles may not be analyzed. Improper bottles include, but are not limited to: plastic water bottles, soda bottle, gatorade bottles, glass containers or any other food and beverage container. Chemical resistant plastic bottles can be purchased from Uline, US Plastics, or may be obtained from A Brite Company (request them from your sales representative.) **For Basic Analysis only 100 mL of sample is required.** We sincerely appreciate your continued trust in our lab for your chemical analysis.
